SUMMARY

Results-driven Data Scientist with 2+ years of experience in financial risk analytics, data governance, and ML-driven reporting across wealth management and tech sectors. Built risk-scoring dashboards tracking portfolio risk exposure across 150+ client portfolios and automated controls and alerting systems that reduced manual oversight effort by 40%. Developed ChurnGuard - an auditable AI platform using SHAP explainability for transparent, compliant ML predictions identifying \$1.53M revenue at risk. Won the Karnataka State Best ML Project Award. Proven track record of cross-functional collaboration, stakeholder management, and translating complex data into strategic risk and business recommendations.

Core Strengths: Risk Analytics & Reporting | Stakeholder Communication | Data Governance | Cross-functional Collaboration | Auditable ML & Compliance

SKILLS SUMMARY

Programming: Python · SQL · R

Libraries & Analytics: Pandas & NumPy · Scikit-learn · BeautifulSoup & Selenium · ETL Pipelines · Statistical Analysis · Financial Data Analysis

BI & Visualisation: Power BI · Tableau · Plotly & Matplotlib · Folium (Geospatial Mapping) · Excel (Pivot Tables, VLOOKUP, Dashboards)

ML & AI: Large Language Models (LLMs) · NLP · Linear Regression & Predictive Modelling · Random Forest & Classification · XGBoost & Gradient Boosting · SHAP Explainability · Customer Churn Modelling · CLV Analysis

Tools & Platforms: Git & GitHub · Docker · Streamlit · Linux · MySQL · Jupyter Notebook & VS Code · Agile

RELEVANT PROFESSIONAL EXPERIENCE

Data Analyst & Research Associate - VM Wealth	Mar 2023 - Jun 2025 Pune, India
- Built 5 interactive Power BI dashboards tracking portfolio risk exposure, risk scores, and sector allocation across 150+ HNW client portfolios, with automated Python-powered alerting and data refresh controls - reducing manual oversight effort by 40%. - Conducted risk-adjusted performance analysis (Sharpe ratio) across equity, fixed income, and alternative assets for 150+ portfolios; authored risk research reports delivering strategic recommendations. - Partnered with Operations and BA teams to translate complex data into clear business and risk recommendations, reducing reporting turnaround time by 30%.	
Data Systems & Backend Developer - IIT Kanpur - Prutor Online Education Platform	Sep 2022 - Mar 2023 Uttar Pradesh, India
- Optimised backend database operations and data lifecycle management for an education platform serving 10,000+ users, improving query performance across 30+ queries and reducing latency by 35% through indexing and schema refinement. - Enhanced application performance by implementing automated error detection and logging scripts using Python, reducing system downtime by 30% and ensuring platform stability.	
Data & Operations Analyst - Self-Employed	Nov 2025 - Present Melbourne, Australia
- Modelled historical surge pricing data and local demand peaks in Excel to optimise shift scheduling, improving hourly earnings by 20% through strategic time and route allocation across Melbourne metro. - Tracked daily income, expenses, and mileage using Excel spreadsheets and financial records, enabling data-driven operational decisions for a self-managed contracting entity. - Maintained 95%+ customer satisfaction rating through consistent route planning and time management strategies while independently managing logistics across high-demand periods.	

PROJECTS

ChurnGuard - Customer Retention Platform	Mar 2026
- Built an end-to-end customer churn prediction platform processing 7,043 customer records, training and auto-selecting between Logistic Regression, Random Forest, and XGBoost models achieving ~0.85 AUC-ROC. - Integrated SHAP explainability for global and individual-level predictions, enabling transparent and auditable predictions - critical for regulatory compliance. - Engineered a CLV-based priority scoring system identifying \$1.53M revenue at risk across 428 critical customers, plus a campaign ROI simulator calculating net benefit and ROI percentage for retention strategies.	

Australian Economic Intelligence Dashboard	Jan 2026
---	----------

- Engineered an economic intelligence platform scraping live RBA/ABS data, tracking rental prices across 5 cities, job market trends, and cost of living - consolidating 5+ fragmented sources.
- Deployed Linear Regression for rental price predictions and integrated a Groq LLaMA 3.3 70B AI advisor for real-time economic Q&A.

ASX Financial Report Intelligence Platform

Oct 2025

- Architected an AI-powered platform using Groq LLaMA 3.3 70B that has processed 50+ ASX annual reports, extracting revenue, profit, sentiment, risks, and growth insights from unstructured PDFs via pdfplumber.
- Designed an ETL pipeline from PDF ingestion (pdfplumber) through NLP to a live Streamlit dashboard with Plotly visualisations for self-service financial analysis.

Australian Job Market Analytics Dashboard

Aug 2025

- Built an ETL pipeline from web scraping (BeautifulSoup/Selenium) to Streamlit Cloud, processing 10,000+ job listings across 8 Australian cities.
- Designed interactive Plotly and Matplotlib charts for multi-dimensional exploration of job trends by city, industry, work type, and salary range.

Solar-Powered Smart Water Management System

Sept 2023

- Architected an IoT-ML water management system integrating sensors, solar-powered reverse osmosis, and ML models to address water scarcity.
- Developed a Random Forest classifier achieving 92%+ accuracy for water quality assessment, significantly reducing manual testing cycles.
- Won the Karnataka State Best ML Project Award for innovation in AI-driven sustainability.

EDUCATION

Master of Data Science, RMIT University

Expected May 2027

Specialising in Machine Learning, Statistical Modelling, and Data Engineering - Melbourne, Australia

Bachelor of Engineering, Computer Science & Engineering - Visvesvaraya Technological University Sep 2024

Relevant Coursework: Analysis of Algorithms, Database Management Systems, Machine Learning, Data Structures, Operating Systems, Computer Networks, Object-Oriented Programming - Karnataka, India

CERTIFICATIONS

- Deloitte Australia Data Analytics Job Simulation - Forage (Feb 2026)
- Python for Data Science & Analytics - Great Learning Academy (Oct 2023)
- Project Management Certificate - LinkedIn Learning (Nov 2023)
- Data Science Solutions Certificate - Cisco (Nov 2023)

EXTRACURRICULAR ACTIVITIES

Co-Chair - IEEE Student Branch, Visvesvaraya Technological University Oct 2022 - Dec 2023 | Karnataka, India

- Organised 5+ AI/ML workshops for 200+ students, coordinating faculty and volunteer teams to deliver hands-on technical learning experiences.

President - Rotaract Club, Visvesvaraya Technological University Jul 2022 - Jun 2023 | Karnataka, India

- Led 15+ community service initiatives, growing club membership by 40% and establishing cross-university partnerships for expanded social impact.

Campus Community Representative - RMIT University

Aug 2025 | Melbourne, Australia

- Guided 500+ prospective students at RMIT Open Day events, supporting enrolment decisions across programs and campuses.
